VARIABLE DIAMETER HANDLEBARS

WITH CONICAL DESIGN

- 7010 T6 aluminum aerospace quality
- Oversize bar made with a variable diameter and wall thickness
- 1 1/8" (28,6 mm) diameter in the clamping area
- 7/8" (22 mm) diameter at the control ends
- 40% lighter and stronger than a classic bar
- Laser etched to aid in handlebar centering and indexing
- Knurled clutch side for better grip hold
- Bar pad included

THROTTLE TUBE + GRIPS

- Designed to work with the SFH Handlebars
- Reduced diameter Throttle tube
- Cannot be used with standard handlebars
- Low friction material provides smooth operation
- SFH Grips Included
- Throttle cams included to fit most applications

0632-0812

REPLACEMENT GRIPS

- Designed to work with the SFH Handlebars & Throttle Tubes
- Reduced diameter Throttle tube, external diameter remains the same as standard grips
- Cannot be used with standard handlebars
- Half-Waffle pattern, soft and comfortable grips

0630-2125

SFS

SMOOTH FEELING SYSTEM

SFS Air clamps have an exceptional shock absorbing capacity, this is created by an air/oil system and especially with a valve that enables the riders to regulate the air pressure.

With 10 mm stroke (A), NK SFS air clamp guarantees to riders more precision in riding, a longer physical freshness and an arm pump decrease.

NK SFS air clamp works in the same direction as the front fork but this system is more sensitive. It enables a reduction of impacts in hands, forearms, shoulders and help to choose easier trajectories.

The pneumatic control permits to choose the damping following your riding level and also following your category in motocross, supercross, or enduro.

In order to completely take advantage of the SFS clamps, complete instructions are delivered with it.

SFS TOP CLAMPS

- CNC machined from aerospace quality Tridium Alloy
- Handlebar clamp included (28,6 mm handlebar (1 1/8"))
- The industry's first air-adjustable, oil-damped suspended handlebar clamp, offering 10 mm of travel
- Improve the riding comfort, decrease the arm pump
- Developed in collaboration with top US MX/SX & MXGP teams
- No service required
- Torque settings noticed on clamps
- Patented in Europe and USA
- High pressure air pump (Part# 3805-0124) required to adjust the clamps
