R-WORKS FATBAR36

- Ultimate lightweight motocross handlebar
- Constructed of new, proprietary Zarilium™
- Designed using Renthal's new 36Tech™ technology to maintain strength of existing Fatbar while reducing weight 36%
- Work with standard controls; ends taper down to 22 mm
- Require 36Tech™ bar mount clamps
- Bar pad included

HANDLEBAR DIMENSIONS

FATBAR36 OVERVIEW

Working alongside factory race teams Renthal developed the concept to improve performance through weight reduction without compromising existing handlebar strength. Every time you accelerate, brake, corner, jump you work against the weight of the motorcycle. By reducing weight, it improves the performance of your motorcycle in all of these areas resulting in faster lap times.

Renthal has employed its 50+ years of experience in handlebar design, testing and racing to develop the R-Works Fatbar36 the ultimate in lightweight motocross handlebars. Utilising Renthal's 36Tech™ handlebar standard and proprietary Zarilium™ material to give a high strength handlebar at the lowest possible weight. The R-Works Fatbar®36 is 36% lighter than the standard 28 mm diameter Fatbar®, previously the lightest motocross handlebar.

LIGHTEST MOTOCROSS HANDLEBAR

Renthal has always strived to produce the strongest, highest quality product. The current handlebar range is at a strength level the factory level teams feel it needs to be, but weight saving will always be high on their priority list. Renthal made this his priority as well in developing Fatbar36.

36TECH™ - ADVANCED TECHNOLOGY

36TECH™ is a new handlebar standard developed by Renthal to push forward the boundaries of handlebar technology. The 36 mm clamping diameter tapers down to a conventional 22 mm control section at each end, using advanced wall geometry, maximising material efficiencies in wall thickness along the entire length of the handlebar to reduce weight.

NEW MATERIAL – 20% STRONGER

Zarilium® is a new aluminium alloy exclusive to Renthal. This new alloy has 20% greater ultimate tensile strength, while maintaining the same elongation properties. This additional strength has allowed Renthal to achieve the maximum weight reduction possible whilst matching the best in class strength of the Renthal® 28 mm diameter Fatbar®.

WORLD CLASS TESTING

Renthal is at the forefront of handlebar testing. The only handlebar manufacturer using data acquisition and equipped with its own in house test facility. This perfectly positions Renthal to maximise it's 50+ years of handlebar design, development and championship winning race experience. The result is the best performing handlebars with unrivalled quality.

STATE-OF-THE-ART MANUFACTURING

As the globally leader in handlebar technology Renthal prides his self, not only on engineering abilities, but also its state-of-the-art manufacturing facility. Taking raw Zarilium tube Renthal puts it through a host of operations to turn it into Fatbar36.

R-WORKS®

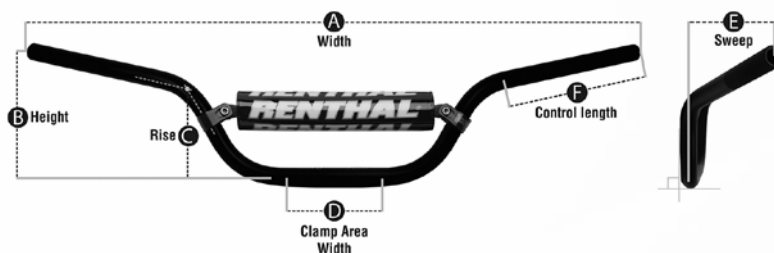

The R-Works® badge represents uncompromising performance. It means Renthal has selected the ultimate materials and manufacturing processes to bring you the very best performance product they can. A fraction of a second. A few grams. A couple of millimetres. It all counts.

FATBAR™ HANDLEBARS

- 7010-T6 aluminum alloy, braceless design to reduce weight while maintaining an extremely high strength
- The braceless design allows for a comfortable level of flexibility
- 28,6 mm (1¹/₈") clamping area reduces slippage
- Laser-etched positioning grid; knurled clutch side bar end prevents grip slippage
- Shot-peened, anodized finish resists corrosion
- Each handlebar includes an updated injection molded foam bar pad for better protection and greater durability
- Require 28,6 mm (1¹/₈") bar mounts for bikes originally equipped with 22 mm (7¹/₈") bars (see next page)

TWINWALL® HANDLEBARS

- Constructed of two aluminum alloy tubes, one inside the other
- Outer tube is 7010-T73, has extreme resistance to mechanical damage and is anodized to prevent corrosion
- Inner tube is ultra-high strength 7010-T6 aluminum, hard anodized to resist wear from twist grip and controls
- Rubber seals are used to cover the ends of the outer tube to keep water and cleaning fluids out
- Laser-marked in the middle for accurate positioning
- Available with anodized finish in your favorite racer's bend
- Each handlebar includes an updated injection-molded foam bar pad for better protection and greater durability
- Require 28,6 mm (1¹/₈") bar mounts for bikes originally equipped with 22 mm (7¹/₈") bars (see next page)

REINFORCED DUAL-COMPOUND GRIPS

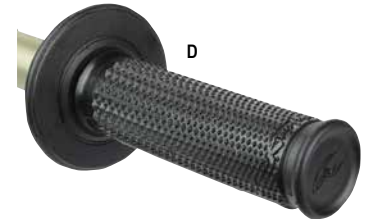

- Reinforced with aramid resin particles
- Resist wear while maintaining tacky feel
- Half-waffle design
- Available in standard and tapered style
- Sold in pairs

DESCRIPTION	PART #	DESCRIPTION	PART #
(A) Dual compound	0630-0265	(B) Dual compound tapered	0630-0266

ULTRA TACKY™ DUAL COMPOUND GRIPS

- Developed to increase traction between the glove and grip, increasing control and reducing rider fatigue
- Unique Ultra-Tacky™ compound constantly produces and renews a sticky surface coating
- Combine with Renthal® soft compound for comfortable and incredibly grippy surface

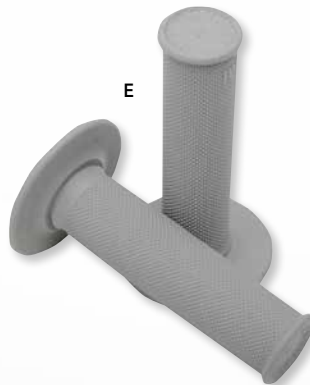

- Sticky surface lasts for the lifetime of the grip; wash with clean water and air dry to re-activate stickiness
- Sold in pairs

HALF-WAFFLE GRIPS

- Waffle pattern in finger area for traction, smooth on palm side to reduce blisters
- Available in soft, medium and firm compounds
- Use with twist throttles
- Sold in pairs

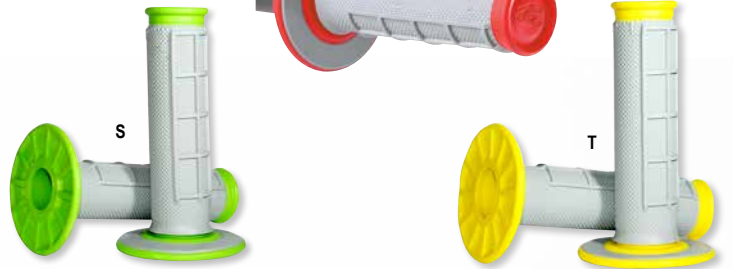

DESCRIPTION	PART #	DESCRIPTION	PART #	DESCRIPTION	PART #
(K) Soft	RG025	(L) Medium	RG02M	(M) Firm	RG02F

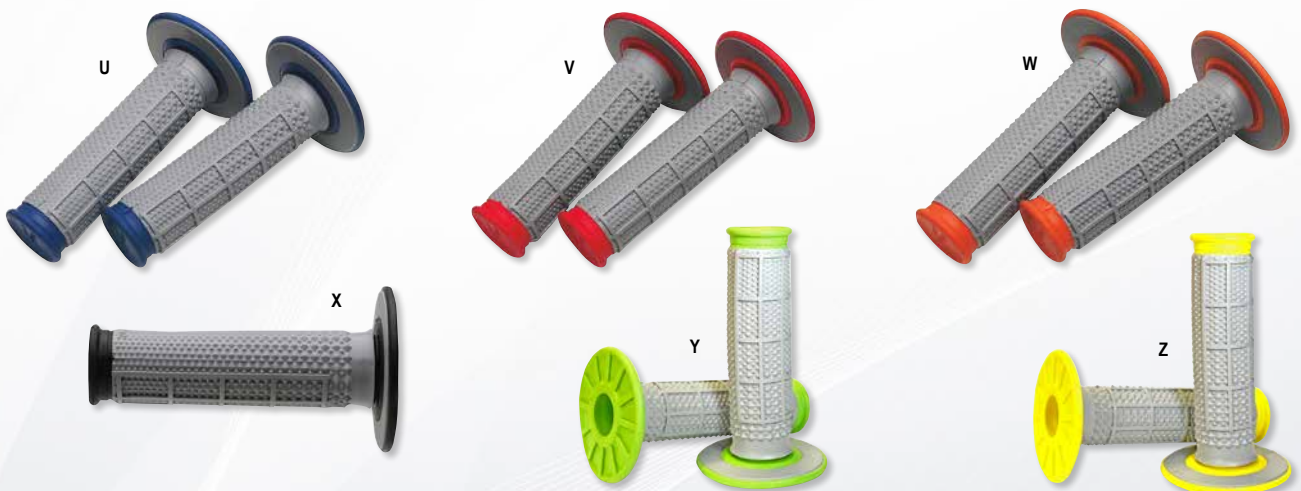

DUAL-COMPOUND GRIPS

- Combine the durability of Renthal firm compound grips with the feel and absorption qualities of the Renthal range of softer compound grips
- Firm compound used for the flange, inner sleeve and outer-end of the grip for maximum durability; softer compounds are used for the outer diameter of the grip, which is in direct contact with the palm, fingers and thumb
- For use with twist throttle
- Sold in pairs

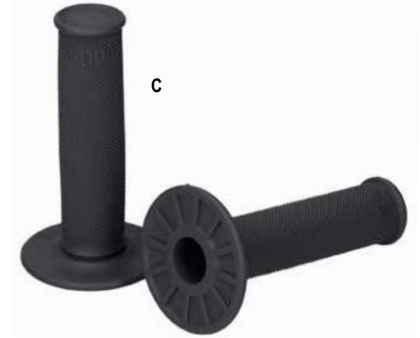

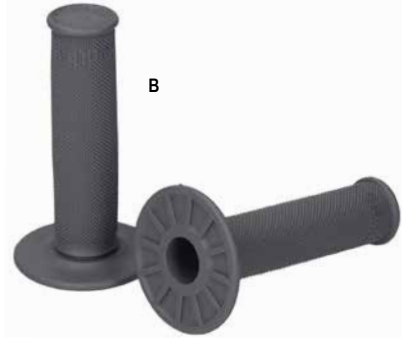

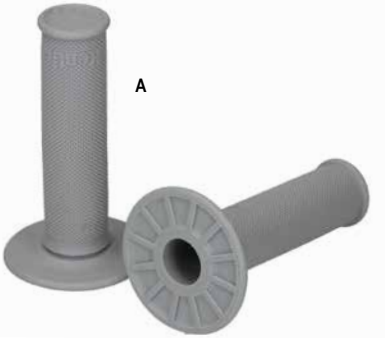

DESCRIPTION	COLOR	PART #	DESCRIPTION	COLOR	PART #	DESCRIPTION	COLOR	PART #

TAPERED DUAL-COMPOUND GRIPS

- Oversized thumb diameter tapers to standard size at end to match contours of a closed fist for maximum comfort and control
- Increased material in thumb area for more cushioning and damping against vibration without reducing control
- Soft compound used for the outer diameter of the grip, which is in direct contact with the palm, fingers and thumb
- Firm compound used for the flange, inner sleeve and outer-end of the grip for maximum durability
- Offer the ultimate combination of comfort and durability
- For use with twist throttle
- Sold in pairs

TRIAL GRIPS DIAMOND

- Renthal trials grips have been an industry standard and have been used by more world champions than any other grip on the market.
- Available in three advanced rubber compounds, soft, medium and firm, the trials grips feature a smaller inner flange and an all diamond pattern for the greatest amount of tackiness, shock absorption and feel.

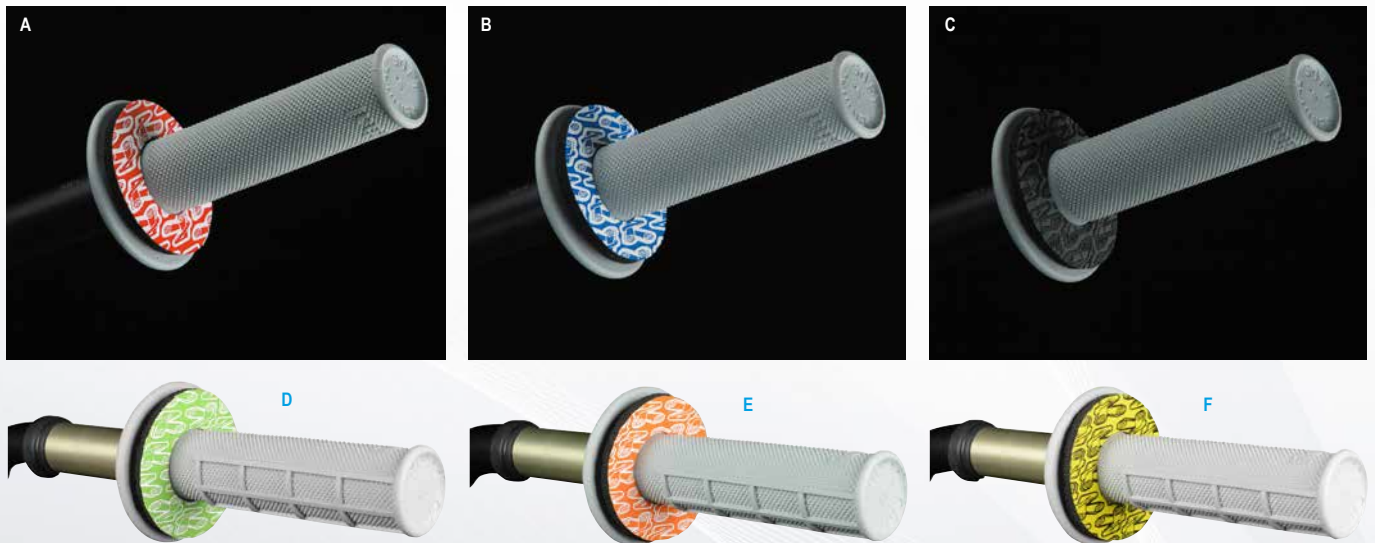

DESCRIPTION	PART #	DESCRIPTION	PART #	DESCRIPTION	PART #

MOTO HANDGUARDS

- Excellent protection against rocks and roost
- Lightweight, dual-compound molded plastic shield with flexible synthetic rubber edge
- Reinforced composite plastic mounting bracket offers protection and allows guard to flex in the event of a crash
- Mounts independently of perches for versatility and does not interfere with controls
- Includes blue, black and red sticker kits
- Sold in pairs

RC-1 WORKS BRAKE PADS SINTERED

- Premium high-performance sintered metal brake pads designed specifically for motocross and off-road racing applications
- Combine excellent wet and dry braking performance with maximum stopping power
- Sintered-metal compound is made from nine different materials to help reduce brake fade
- Specially formulated for quick bed-in time and immediate response
- Ceramic heat shield backing reduces overheating of the brake fluid
- Inter-granular graphite structure helps prevent brake noise
- Vacuum Press Furnace (VPF) production ensures a consistent density throughout the entire pad which helps maintain a high level of performance for the life of the pad

FRONT SPROCKETS

- CNC-machined from case hardened and core refined 655M13 nickel chromium steel
- Machined self-cleaning mud grooves at each tooth to help prevent mud buildup and increase wear resistance
- Certain models available in ultralight design for a 10-15% weight savings

REAR SPROCKETS

- CNC-machined from a specially enhanced 7075-T6 aluminum alloy
- Machined self-cleaning mud grooves at each tooth to help prevent mud buildup and increase wear resistance
- Ultralight design is 66% lighter than steel, yet incredibly durable
- Silver available for all models; black, blue, red and orange anodized finish available for certain models
- #1 sprocket used in supercross, motocross and offroad throughout the world

TWINRING™ REAR SPROCKETS

- Inner ring is the same high strength Ultralight™ 7075-T6 aluminum used for the standard Renthal sprocket
- Outer ring is electroless nickel coated steel for ultimate durability and designed with the minimum amount of material to keep weight down
- The outer ring is expanded at 200°C and then fitted over the inner; this interference fit combined with the wave pattern ensures a permanent bond for the life of the chainwheel
- Flat socket setscrews add additional strength to the chainwheel during side impacts and eliminates contact with the chain guide
- Self-cleaning mud grooves between each tooth prevent mud buildup and reduce chainwheel wear and weight
- Will outlast a standard all-aluminum sprocket by three times, yet is much lighter than an all steel rear sprocket

415 R1 WORKS CHAIN

- Premium high-strength chain; impact load resistance
- Steel plates shot-peened for high strength and maximum resistance
- Chamfered inner links reduce derailment
- Pre-formed bushings distribute load for longer chain life
- Recommended for MX 2-strokes up to 70cc, MX 4-strokes up to 100cc and trials bikes up to 125cc
- Includes masterlink and pair of latex gloves

DESCRIPTION	PART #	DESCRIPTION	PART #
112 links	1220-0413	Repl. clip connecting link	1225-0550

420 R1 WORKS CHAIN

- A mini version of Renthal's 520 R1 chain for today's high-powered mini racing machines
- Shot-peened alloy steel side plates
- Ultra-high 2091 kg (4609 lb) average tensile strength
- Chromised bearing pins resist wear
- Pre-formed bushings distribute power loads evenly for greater chain life
- Gold-colored side plates; copper-colored rollers
- The perfect match for Renthal sprockets
- Clip type link included

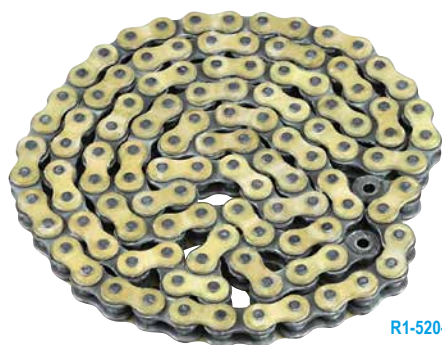

DESCRIPTION	PART #	DESCRIPTION	PART #	DESCRIPTION	PART #
120 links	R1-420-120	130 links	R1-420-130	Repl. clip connecting link	R1-420-ML

428 R1 WORKS CHAIN

- Designed for high-powered mini racing machines up to 100cc capacity that use 428 non-O-ring chain
- Shot-peened alloy steel side plates
- Extended bushings to reduce friction between outer and inner link plates, which maximizes power transmission
- Ultra-high 2039 kg (4496 lb) average tensile strength
- Case-hardened alloy steel bearing pins for maximum resistance to wear
- Gold-colored side plates help reduce corrosion
- The perfect match for Renthal sprockets
- Clip type link included

R1-520-ML

R1-520-120

520 R1 WORKS CHAIN

- Premium-quality, high-strength, lightweight non-O-ring chain
- Specifically designed for racing
- The choice when high strength, light weight and maximum power transfer are essential
- Shot-peened alloy steel side plates
- Ultra-high 3467 kg (7644 lb) average tensile strength
- Chamfered inner links reduce the chance of chain derailment
- Chromised bearing pins resist wear, especially under off-road conditions

- Extended bushings reduce friction, improve power transmission
- Gold-colored side plates help reduce corrosion
- The perfect match for Renthal sprockets
- Clip type link included

520 R3-3 OFFROAD SRS CHAIN

- Update to the R3 chain range; upgraded to the R4 ranges proven quad riveting manufacturing process
- Renthal's SRS (Self-Regulating Seals) system increases service life of chain
- Comes pre-stretched for less adjustment during break in
- Rivet link has also been changed to a hollow end to facilitate easier installation that does not require a Quad Stake Rivet tool to install
- High-carbon alloy steel pins, solid bushings and rollers, and shot peening of plates and rollers for increased fatigue resistance
- 520 pitch; average tensile strength 3366 kg (7420 lb)

FATBAR®

- Aluminum 7010-T6 construction with unbraced design
- Same Offroad Fatbar® make and design
- Shot peened anodized finish
- Laser-etched positioning grid
- Tapered outer wall design; 28,6 mm (1 1/8") clamping diameter with 22 mm (7/8") control ends
- Bar pad not included

22 MM (7/8") STREET HANDLEBARS

- 22 mm (7/8") external diameter to fit all standard sized clamps and controls
- Exclusive aerospace aluminum 7010-T6 alloy is precisely engineered for the best combination of strength and fatigue reduction
- High-impact strength, lightweight and vibration absorbing
- Anodized to protect against corrosion

REINFORCED DUAL-COMPOUND GRIPS

- The most advanced grip available
- Feature aramid fibers in a soft compound
- Last three times longer than regular soft grips
- Available in standard full diamond pattern
- Sold in pairs

DESCRIPTION	PART #	DESCRIPTION	PART #	DESCRIPTION	PART #	DESCRIPTION	PART #

0630-0592

DUAL-COMPOUND GRIPS

- Renthal Dual Layer Grips combine the durability of Renthal Firm Compound Grips with the feel and absorption qualities of the Renthal range of softer compound grips
- Firm compound is used for the flange, inner sleeve and outer-end of the grip for maximum durability; softer compounds are used for outer diameter of the grip, which is in direct contact with the palm, fingers and thumb
- Feature a smaller inner flange and a pre-cut hole in the end to accommodate bar ends
- Available in full diamond pattern in black/gray color
- Available in 29 mm and 32 mm
- Sold in pairs

0630-0643

0630-0644

SINGLE-COMPOUND GRIPS

- 29 mm full diamond design
- Extra firm grip is for long distance touring
- Firm grip has the same feel as a stock grip, very strong with good resistance to tearing
- Soft grip gives a very comfortable ride with great feel
- Medium grip is a compromise between soft and firm
- Sold in pairs

STREET SPROCKETS

- CNC-machined (not stamped) and feature a computer-aided ultra-light design to reduce unsprung weight and increase power transfer
- Rear sprockets made from high-strength, specially enhanced 7075-T6 aluminum that is 33% lighter than steel to further reduce weight and increase power transfer without sacrificing strength
- Rear sprockets also feature a special tooth profile that allows the chain to roll easily on and off the sprocket for longer wear, less noise and more power
- Front sprockets made from case-hardened, core-refined nickel-chrome-molybdenum alloy steel for the ultimate combination of strength and hardness

CHAINS

RR4 SRS ROAD RACE CHAIN

- 520 pitch that is developed exclusively for Superbike racing applications
- Utilizes Renthal's Self Regulating Seal (SRS) technology to increase the service life of the chain in road applications; enhances chain flexibility for smoother operation
- Features high-alloy steel plates and pins, solid bushings and rollers, shot-peened side plates and gold sides
- Pre-stretched for less adjustment during break in
- Includes a pair of latex gloves for mess-free installation
- Available in 520 pitch only, average tensile strength: RR4 SRS 520 36,5 kN (8206 lbs)
- Rivet only link included

R4 SRS ROAD CHAIN

- Specially developed sealed ring chain utilizes Renthal's Self Regulating Seal (SRS) technology to increase the service life of the chain in road applications; enhances chain flexibility for smoother operation
- Features high-alloy steel plates and pins, solid bushings and rollers, shot-peened side plates and gold sides
- Comes pre-stretched for less adjustment during break in
- Comes with a pair of latex gloves for mess-free installation
- Rivet only link included

520 R4 SRS

- Average tensile strength 35,9 kN (8092 lbs)
- Ideal for street bikes up to 1000cc

520 R3-3 SRS CHAIN

- Renthal's SRS (Self-Regulating Seals) system increases service life of chain
- Comes pre-stretched for less adjustment during break in
- Rivet link has been changed to a hollow end to facilitate easier installation that does not require a Quad Stake Rivet tool to install
- High-carbon alloy steel pins, solid bushings and rollers, and shot peening of plates and rollers for increased fatigue resistance
- 520 pitch; average tensile strength 34,8 kN (7820 lbs)

FATBAR™ HANDLEBARS

- Aluminum alloy, with a no-brace design and 5.0 mm wall thickness at the bends to add strength
- 1 1/8" clamping area reduces slippage
- Combine excellent strength with resilience
- Laser-etched positioning grid; knurled bar end prevents grip slippage
- Shot-peened, anodized finish resists corrosion
- Include bar pad

ATV DUAL-COMPOUND GRIPS

- ATV-specific grips feature a smaller inner flange and two grips of the same diameter for thumb throttle use
- Combine the durability of Renthal firm compound grips with the feel and absorption qualities of Renthal soft grips
- Firm compound is used for the flange, inner sleeve and outer end of the grip for maximum durability
- Soft compound used for the outer layer of the grip, which is in direct contact with the palm, fingers and thumb
- Half waffle design
- For use with thumb throttle
- For 7/8" bars; 4 9/16" L
- Sold in pairs

SPROCKETS

- CNC-machined from case-hardened and core-refined 655M13 nickel chromium steel
- Machined self-cleaning mud grooves at each tooth to help increase wear resistance
- Certain models available in ultralight design for a 10-15% weight savings

REAR SPROCKETS

- CNC-machined from a specially enhanced 7075-T6 aluminum alloy
- Machined self-cleaning mud grooves at each tooth to help increase wear resistance
- All rear sprockets are the ultralight design, making them 66% lighter than steel, yet incredibly durable
- Available in silver
- #1 sprocket used in supercross, motocross and offroad throughout the world

¹ Ultralight

520 R3 CHAIN

- Newest update to the R3 chain range
- Chain design does away with the "O-ring" and instead incorporates Renthal's SRS (Self-Regulating Seals) ring system to increase chain longevity
- Chain has been upgraded to the R4 ranges proven quad riveting manufacturing process
- Rivet link has also been changed to a hollow end to facilitate easier installation that does not require a Quad Stake Rivet tool to install
- High-carbon alloy steel pins, solid bushings and rollers, and shot peening of plates and rollers for increased fatigue resistance
- Clip type and rivet link included
- 520 pitch; average tensile strength 7420 lbs.

DESCRIPTION	PART #
104 links	1222-0450
114 links	1222-0451
116 links	1222-0452

DESCRIPTION	PART #
120 links	1222-0453
Repl. rivet link	1222-0454

520 R1 WORKS CHAIN

- Premium-quality, high-strength, lightweight non-O-ring chain
- Specifically designed for racing
- The choice when high strength, light weight and maximum power transfer are essential
- Shot-peened alloy steel side plates
- Ultra-high 7,644-lbs. average tensile strength
- Chamfered inner links reduce the chance of chain derailment
- Chromised bearing pins resist wear, especially under off-road conditions
- Extended bushings reduce friction, improve power transmission
- Gold-colored side plates help reduce corrosion
- Clip-type link included

DESCRIPTION	PART #
114 links	R1-520-114
116 links	R1-520-116
120 links	R1-520-120
Clip connecting link	R1-520-ML

520 R4 ATV Z-RING CHAIN

- Patented Z-ring seals dramatically increase the life of the chain by trapping specially formulated grease around the critical pin and bush area
- Larger diameter pins manufactured from specially enhanced steel improve the resistance to shock loads
- A quad riveting process on each pin increases the tensile strength of the chain
- Thicker inner and outer plates increase the fatigue life of the chain
- Recommended for engines up to 900cc
- Tensile strength 7,868 lbs.
- Latex gloves included for mess-free installation
- Clip type and rivet link included

DESCRIPTION	PART #
100 links	1224-0023
110 links	1224-0024
120 links	1224-0025

DESCRIPTION	PART #
Clip-type connecting link	1225-0091
O-ring rivet link	1225-0090
